When: 8th – 10th September 2015 – Cairo University

JUNIPer
NETWORKS

Why Attend?

Learn Junos, the industry's high performance network operating system

Attend at absolutely no cost!

Free JNCIA-Junos exam voucher!

About the Course
This course has been designed for networking, engineering, and computer science students with beginner/intermediate knowledge of networking. The three days of instructor-led training covers content from the following three Juniper courses (allowing students to prepare for their JNCIA certification):
- *Networking Fundamentals*
- *Introduction to the Junos Operating System* (IJOS)
- *Junos Routing Essentials* (JRE)

These classes provide students with an understanding of networking fundamentals, the Junos OS and basic routing and switching. A free exam voucher will be provided to students who would like to take the JNCIA exam once they have had the opportunity to study.

Specific topics of the course include:

Networking fundamentals

Junos OS fundamentals

User interface options

Junos configuration basics

Operational monitoring and maintenance

Routing fundamentals

Routing policy and firewall filters

Class of Service

Cost: FREE – no cost to attendees

How to Register
